PROJECTS

STORIO APP, Live **|** GitHub
A full stack web app to connect those who have extra storage space with those who need space to store their stuff
- Developed the appearance and functionality using **CSS3**, **React JS**, and the **Google Maps API**
- Built a database and server using **PostgreSQL**, **Node.js** and **Express.js**

ERIC CLAPTON SHOP, Live **|** GitHub
A full stack Shopping Cart app which allows you to view products (list/detail), add to cart, view cart, and checkout
- Created a **PostgreSQL** database and server endpoints using **Node.js** and **Express.js**
- Designed a responsive front end using **CSS3**, **Bootstrap** 4, and **React JS**
- Utilized **Fetch API** for retrieving data from the backend to update and display it on the **DOM**

MEMORY MATCH, Live **|** GitHub
A responsive and dynamic card matching game where Elmer Fudd chases Bugs Bunny
- Designed using **HTML5**, **CSS3**, and **JavaScript** with **jQuery** to manipulate the **DOM** and provide functionality
- Utilized media queries and **Flexbox** to implement responsiveness across desktops, tablets and phones
